

Priyanka Yohanna Ceri

Mechatronics Engineering Graduate | MSc Motorsport Engineering | Powertrain & Drivetrain
priyanka.ceri@gmail.com | +44 7404 244 217 | Oxford, UK

PROFILE

Mechatronics Engineering graduate currently pursuing an MSc in Motorsport Engineering, with hands-on motorsport experience spanning powertrain and drivetrain design, mechanical engineering, manufacturing, testing and vehicle performance. Led the PowerTrain division of a university motorsport team, working across engine, cooling and drivetrain systems, including the design and manufacture of custom go-kart sprockets. Experienced in taking components and systems from design through manufacture, assembly and testing, with additional exposure to vehicle CFD and thermal management.

EDUCATION

MSc Motorsport Engineering | Oxford Brookes University, Oxford, UK | 2026–Present
B.Tech in Mechatronics Engineering | Manipal Institute of Technology, Manipal, India | 2022–2026
• CGPA: 7.23/10

ENGINEERING EXPERIENCE

PowerTrain Head, Team Karting Manipal

(OCT 2023–NOV 2025)

- Led the PowerTrain division of a student motorsport project focused on designing, building and racing custom go-karts.
- Worked across engine, cooling and drivetrain systems, with responsibility spanning design, development, manufacturing, assembly and testing.
- Designed and manufactured custom drivetrain components including go-kart sprockets, supporting system integration and performance development.
- Coordinated manufacturing and testing activities within the powertrain division and worked closely with other team members to deliver the complete vehicle.
- Served as the team's official racer, using driving experience and vehicle feedback to support kart performance development.

Project Intern, Greaves Electric Mobility

(JAN 2026–JUL 2026)

- Used CFD software to analyse and maximise airflow through two-wheeler vehicles to support cooling of the battery and motor control unit (MCU).
- Designed and optimised a thermoelectric cooling system using CFD.

Senior Member, SAE Club

(OCT 2023–OCT 2024)

- Gained hands-on vehicle design and analysis experience through automotive engineering workshops and training.

Member, Team Manipal Racing (TMR)

(SEP 2022–AUG 2023)

- Contributed to the design and calculation of a four-wheel-drive system, focusing on gearbox and differential systems.

MOTORSPORT ACHIEVEMENTS

- FMAE Formula Karting Design Challenge: Competition's first and only female go-kart driver.
- EV Category: 1st in Business Plan, 2nd in Design Report and 4th Overall.

ENGINEERING PROJECTS & PATENT APPLICATIONS

- **Go-Kart Sprockets:** Patent application — A System and Method for Enhancing Durability and Performance of Go-Kart Sprockets.
- **Quickshifter & Autoblipper:** Patent application — A System and Method for Enhancing Gear Transitions in Go-Kart using Quickshifter and Autoblipper.
- **Pneumatic Shifting:** Patent application — A System and Method for Pneumatic Gear Shifting in Go-Karts.

TECHNICAL SKILLS

- **CAD:** SolidWorks, Fusion 360, CATIA, AutoCAD, Siemens NX
- **CAE / CFD:** ANSYS Workbench, ANSYS Fluent, HyperMesh CFD, STAR-CCM+, Altair SimLab
- **Core engineering:** Powertrain design, drivetrain optimisation, transmission systems, gearbox and differential systems, Computational Fluid Dynamics
